Education

OP Jindal University, Raigarh

Bachelor of Technology (B.Tech) in Computer Science Engineering

Expected June 2027

CGPA: 7.8/10

Relevant Coursework:

Data Structures, Computer Networks, NLP, Computer Vision, Artificial Intelligence, Machine Learning, Deep Learning, Database Management, Operating System, PPL.

Projects

Face based attendance system 🐙

Dec 25 - apr 26

Tech Stack: OpenCV, Tkinter, Tk-Tools, Datetime, Python-CSV, Numpy, Pillow, Pandas, Times, Pytest-Shutil

- Developed an automated attendance management system using face recognition and computer vision techniques.
- Built modules for image dataset collection, preprocessing, face detection, and real-time recognition.
- Integrated CNN-based recognition models to improve attendance accuracy and identification speed.
- Designed a user-friendly GUI using Tkinter for easy interaction and attendance management.
- Stored attendance records efficiently using CSV and data-processing libraries.
- Explored future enhancements including mobile deployment and IoT integration.

Technical Skills

DSA: problem solving using C++, LeetCode practice

Languages: Python, C, C++, SQL

Web Development: HTML, CSS, JavaScript

Tools and Platform : Git, GitHub, VS Code , Leetcode

Training and Workshop

- Participated in Artificial Intelligence and Machine Learning workshops focused on practical implementation and emerging technologies. Feb 2026
- Attended IT and software development workshops covering programming fundamentals and industry tools. Jan 2026
- Completed coursework and self-learning modules in Data Structures & Algorithms and Web Development.
- Regularly practice coding problems and algorithmic challenges on LeetCode.

Certificates and Achievements

- IBM web development certificate
- Introduction to IOT NPTEL
- Consistently improving problem-solving skills through coding practice and technical learning.
- Active learner in AI, Machine Learning, and modern software development technologies.
- Passionate about building real-world applications and exploring emerging technologies.

strength

- quick learner, Team Collaboration ,Analytical Thinking ,Problem Solving ,Communication Skills ,Adaptability

Career Objective

Seeking internship and learning opportunities in Software Development, Artificial Intelligence, or Machine Learning where I can apply my technical knowledge, contribute to innovative projects, and gain valuable industry experience while continuously enhancing my skills.
